

## LOCTITE® 5103™

January 2007

### PRODUCT DESCRIPTION

LOCTITE® 5103™ provides the following product characteristics:

<b>Technology</b>	Dimethacrylate ester
<b>Appearance (uncured)</b>	Opaque pink paste <sup>LMS</sup>
<b>Cure</b>	Anaerobic
<b>Components</b>	One component - requires no mixing
<b>Strength</b>	Medium
<b>Application</b>	Gasketing and Sealing
<b>Specific Benefit</b>	Good temperature resistance.

LOCTITE® 5103™ cures when confined in the absence of air between close fitting metal surfaces. It is supplied in 2kg bags and is particularly suitable for robotic dispensing.

### TYPICAL PROPERTIES OF UNCURED MATERIAL

Specific Gravity @ 25 °C 1.1

Flash Point - See SDS

Viscosity, Brookfield - HBT, 25 °C, Pa·s:

Spindle TC, speed 2.5 rpm, Helipath 200,000 to 750,000<sup>LMS</sup>

Spindle TC, speed 20 rpm, , Helipath 40,000 to 140,000<sup>LMS</sup>

### Instant Sealing Capability

Anaerobic sealants have the ability to resist low on-line test pressures while uncured. This test was performed with uncured product immediately after assembly of an annular polycarbonate sealing surface with an internal diameter of 50 mm and an external diameter of 70 mm.

Pressure Resistance, MPa:

Induced Gap 0 mm 0.02

Induced Gap 0.125 mm 0.01

Induced Gap 0.25 mm 0.01

### TYPICAL CURING PERFORMANCE

#### Cure Speed vs. Substrate

The rate of cure will depend on the substrate used. The graph below shows the shear strength developed with time on grit blasted steel lap shears compared to different materials and tested according to ISO 4587.

#### Cure Speed vs. Bond Gap

The rate of cure will depend on the bondline gap. The graph below shows the shear strength developed with time on grit blasted steel lap shears compared to different controlled gaps and tested according to ISO 4587.

#### Cure Speed vs. Temperature

The rate of cure will depend on the ambient temperature. The graph below shows the shear strength developed with time on grit blasted steel lap shears at different temperatures and tested according to ISO 4587.

### Cure Speed vs. Activator

Where cure speed is unacceptably long, or large gaps are present, applying activator to the surface will improve cure speed. The graph below shows the shear strength developed with time on grit blasted steel lap shears using and tested according to ISO 4587.

### TYPICAL PROPERTIES OF CURED MATERIAL

#### Physical Properties:

Coefficient of Thermal Expansion:	
ASTM D 696, K <sup>-1</sup>	80×10 <sup>-6</sup>
Coefficient of Thermal Conductivity:	
ASTM C177, W/(m·K)	0.1
Specific Heat:	
kJ/(kg·K)	0.3

### TYPICAL PERFORMANCE OF CURED MATERIAL

Cured for 1 hour at 22 °C

Shear Strength:

Pin & Collar Shear, ISO 10123, N/mm <sup>2</sup> : (grit blasted)	≥1 <sup>LMS</sup>
--	-------------------

Cured for 24 hours at 22 °C

Shear Strength:

Pin & Collar Shear, ISO 10123, N/mm <sup>2</sup> : (grit blasted)	≥7.5 <sup>LMS</sup>
--	---------------------

Lap Shear, ISO 4587, N/mm <sup>2</sup> (psi): (grit blasted)	5
---	---

Tensile Strength, ISO 6922, N/mm <sup>2</sup> : (grit blasted)	7.5
---	-----

### Sealing Capability

An annular shaped gasket with an inner diameter of 50 mm and an external diameter of 70 mm was tested up to 1.3 MPa for leakage.

Sealed to Maximum Induced Gap, mm:

Mild steel	≤0.125
Aluminum 2011T3	≤0.125

### TYPICAL ENVIRONMENTAL RESISTANCE

The following tests refer to the effect of environment on strength. This is not a measure of sealing performance.

### Hot Strength

Tested at temperature

Test Procedure:

Shear strength, ISO 4587

Substrate:

Grit blasted mild steel laps

Cure Procedure:

1 week @ 22°C

### Heat Aging

Aged at temperature indicated and tested @ 22 °C

Test Procedure:

Shear strength, ISO 4587

Substrate:

Grit blasted mild steel laps

Cure Procedure:

1 week @ 22°C

**Chemical/Solvent Resistance**

Aged under conditions indicated and tested @ 22°C.

Environment	°C	% of initial strength		
		100 h	500 h	1000 h
Motor oil	125	100	100	100
Unleaded Petrol	22	95	60	60
Water/glycol 50/50	87	160	110	110

**GENERAL INFORMATION**

**This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be selected as a sealant for chlorine or other strong oxidizing materials.**

**For safe handling information on this product, consult the Safety Data Sheet (SDS).**

Where aqueous washing systems are used to clean the surfaces before bonding, it is important to check for compatibility of the washing solution with the adhesive. In some cases these aqueous washes can affect the cure and performance of the adhesive.

This product is not normally recommended for use on plastics (particularly thermoplastic materials where stress cracking of the plastic could result). Users are recommended to confirm compatibility of the product with such substrates.

**Directions for use:**

1. For best performance bond surfaces should be clean and free from grease.
2. The product is designed for close fitting flanged parts with gaps up to 0.25 mm.
3. Apply manually as a continuous bead or by screen printing to one surface of the flanges.
4. Low pressures (<0.05 MPa) may be used when testing to confirm a complete seal immediately after assembly and before curing.
5. Flanges should be tightened as soon as possible after assembly to avoid shimming.

**Storage**

Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

**Product shall be ideally stored in a cool, dry location in unopened containers at a temperature between 8°C and 28°C unless otherwise labeled. Optimal storage is at the lower half of this temperature range.** Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

**Loctite Material Specification<sup>LMS</sup>**

LMS dated January 15, 2004. Test reports for each batch are available for the indicated properties. LMS test reports include selected QC test parameters considered appropriate to specifications for customer use. Additionally, comprehensive controls are in place to assure product quality and consistency. Special customer specification requirements may be coordinated through Henkel Quality.

**Conversions**

$(^{\circ}\text{C} \times 1.8) + 32 = ^{\circ}\text{F}$   
 $\text{kV/mm} \times 25.4 = \text{V/mil}$   
 $\text{mm} / 25.4 = \text{inches}$   
 $\mu\text{m} / 25.4 = \text{mil}$   
 $\text{N} \times 0.225 = \text{lb}$   
 $\text{N/mm} \times 5.71 = \text{lb/in}$   
 $\text{N/mm}^2 \times 145 = \text{psi}$   
 $\text{MPa} \times 145 = \text{psi}$   
 $\text{N}\cdot\text{m} \times 8.851 = \text{lb}\cdot\text{in}$   
 $\text{N}\cdot\text{m} \times 0.738 = \text{lb}\cdot\text{ft}$   
 $\text{N}\cdot\text{mm} \times 0.142 = \text{oz}\cdot\text{in}$   
 $\text{mPa}\cdot\text{s} = \text{cP}$

**Note:**

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. The product can have a variety of different applications as well as differing application and working conditions in your environment that are beyond our control. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

Any liability in respect of the information in the Technical Data Sheet or any other written or oral recommendation(s) regarding the concerned product is excluded, except if otherwise explicitly agreed and except in relation to death or personal injury caused by our negligence and any liability under any applicable mandatory product liability law.

**In case products are delivered by Henkel Belgium NV, Henkel Electronic Materials NV, Henkel Nederland BV, Henkel Technologies France SAS and Henkel France SA please additionally note the following:**

In case Henkel would be nevertheless held liable, on whatever legal ground, Henkel's liability will in no event exceed the amount of the concerned delivery.

**In case products are delivered by Henkel Colombiana, S.A.S. the following disclaimer is applicable:**

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.
