

LOCTITE STYCAST 1264J Parts AB

August 2013

PRODUCT DESCRIPTION

LOCTITE STYCAST 1264J Parts AB provides the following product characteristics:

Characteristics.			
Technology	Ероху		
Appearance, Resin (Component A)	Clear liquid		
Appearance, Hardener (Component B)	Clear liquid		
Components	Two component - requires mixing		
Mixing Ratio, by weight Component A: Component B Product Benefits	100 : 45 ◆ Low viscosity		
	 High impact strength Improved toughness Thermal shock resistant Cures at ambient or elevated temperatures 		
Cure	Room Temperature or Heat Cure		
Application	Encapsulant, Potting		
Typical Assembly Applications	Laminating		
Operating Temperature	120°C		

LOCTITE STYCAST 1264J Parts AB cures slightly flexible and virtually stress free. Some darkening of the cured material will occur after long exposure to temperatures above 65°C or after prolonged exposure to sunlight. LOCTITE STYCAST 1264J Parts AB is designed for laminating sheets of glass for implosion resistant safety shields for cathode ray tubes and vacuum viewing ports.

TYPICAL PROPERTIES OF UNCURED MATERIAL

Part A Properties

Viscosity @ 25 °C, mPa·s	(cP)	8,500		
Specific Gravity @ 25°C		1.21		
Flash Point - See MSDS				
Part B Properties				
Viscosity @ 25 °C,		35		
Specific Gravity @ 25°C		1		
Flash Point - See MSDS				

Mixed Properties

Pot life @ 25 °C, 100 gram mass, hours	3
Shelf Life @ 18 to 25°C (from date of manufacture days	e), 365
Flash Point - See MSDS	

TYPICAL CURING PERFORMANCE

Cure Schedule

48 hours @ 25°C

8 hours @ 43°C

3 hours @ 65°C

This product may generate excessive heat if cured in thicknesses greater than 25 mm (1 inch) at a temperature above 25°C

The above cure profiles are guideline recommendations. Cure conditions (time and temperature) may vary based on customers' experience and their application requirements, as well as customer curing equipment, oven loading and actual oven temperatures.

TYPICAL PROPERTIES OF CURED MATERIAL

Physical Properties

	Hardness, Shore D @ 25 °C	83		
	Glass Transition Temperature, °C	40		
	Coefficient of Linear Thermal Expansion, ppm/°C:			
	Below Tg	71		
	Above Tg	153		
	Water Absorption @ 25 °C, ASTM D570, %:			
	After 24 hours immersion	0.3		
	After 7 days immersion	8.0		
Electrical Properties				
	Volume Resistivity, ohm-cm	1×10 ¹⁵		

GENERAL INFORMATION

For safe handling information on this product, consult the Material Safety Data Sheet, (MSDS).

DIRECTIONS FOR USE

- Accurately weigh resin and hardener into a clean container in the recommended ratio. Weighing apparatus having an accuracy in proportion to the amounts being weighed should be used.
- 2. For proper results, the weight ratio should be \pm 3%.
- 3. Mix each component well prior to weighing to assure uniform consistency..
- 4. If Part A is cloudy, warm to 50°C until it becomes clear.
- 5. Pour mixture into cavity or mold.
- Complete cleaning of the substrates should be performed to remove contamination such as oxide layers, dust, moisture, salt and oils which can cause poor adhesion or corrosion in a bonded part.
- In the event that release from the mold is desired, a coating of paste wax or a silicone mold release such as MOLD RELEASE 122S is recommended.

Not for product specifications

The technical data contained herein are intended as reference only. Please contact your local quality department for assistance and recommendations on specifications for this product.

Storage

Store in original, tightly covered containers in clean, dry areas. Storage information may be indicated on the product container labeling.

Optimal Storage: 18 to 25°C. Storage below 18°C or greater than 25°C can adversely affect product properties.

Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

Disclaimer

Note:

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. The product can have a variety of different applications as well as differing application and working conditions in your environment that are beyond our control. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results. We strongly recommend that you carry out your own prior trials to confirm such suitability of our product.

Any liability in respect of the information in the Technical Data Sheet or any other written or oral recommendation(s) regarding the concerned product is excluded, except if otherwise explicitly agreed and except in relation to death or personal injury caused by our negligence and any liability under any applicable mandatory product liability law.

In case products are delivered by Henkel Belgium NV, Henkel Electronic Materials NV, Henkel Nederland BV, Henkel Technologies France SAS and Henkel France SA please additionally note the following:

In case Henkel would be nevertheless held liable, on whatever legal ground, Henkel's liability will in no event exceed the amount of the concerned delivery.

In case products are delivered by Henkel Colombiana, S.A.S. the following disclaimer is applicable:

The information provided in this Technical Data Sheet (TDS) including the recommendations for use and application of the product are based on our knowledge and experience of the product as at the date of this TDS. Henkel is, therefore, not liable for the suitability of our product for the production processes and conditions in respect of which you use them, as well as the intended applications and results.
